

# Pharmaceutical Flow Cytometry & Imaging 2016

GLAXOSMITHKLINE, STEVENAGE

22nd - 23rd November 2016

[www.elrig.org](http://www.elrig.org)

## 5th Biennial Pharmaceutical Flow Cytometry & Imaging

Flow cytometry and imaging are two powerful technology platforms that enable high-content analysis of physiologically-relevant cell systems and pre-clinical and clinical biomarkers. Since our first meeting in 2008, we have seen the technology develop and the applications widen across many areas of industrial and academic drug discovery and development. Join scientists from pharma, biotech, CROs and academia working in the field of flow cytometry and imaging to hear presentations by speakers at the cutting edge of the industry.

### Scientific Programme Tracks

**Translational Flow Cytometry and Imaging in Drug Discovery and Development**  
**Big Data and Analytics**  
**Novel and Emerging Technologies**  
**Next Generation Cytomics in Pharmaceutical Research**

### Plenary Keynote Speakers

**Professor Robert Hawkins**, Cancer Research UK  
“The Development of Adoptive T Cell Therapy for Cancer”

**Professor Paul Smith**, Cardiff University  
“Cytometry Of The Tumour Microenvironment: Probes & Therapeutic Targeting”

### Call for Posters

Poster taster session deadline: **27th September**  
Main poster submission deadline: **4th November**

**If you would like to submit a poster abstract, please visit our website**

This event is **FREE TO ATTEND**. Registration now open.
