

Snapshot Lab Services

## Your independent partner for integrated robot and laboratory equipment

- For over twenty years of experience and innovations in laboratory automation
- In-house developments ensures high quality, flexible and elegant designed software
- Professional service & support by licensed experts
- Visit us on [lab-services.nl](https://lab-services.nl) or follow us on social media to get the latest info!

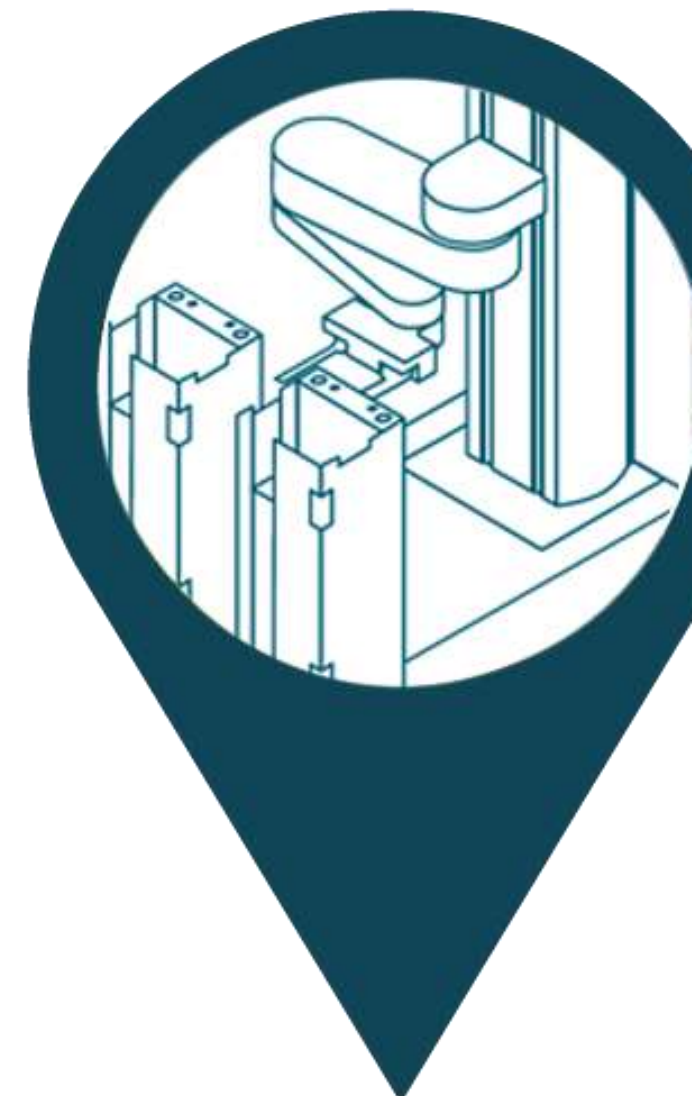

Heron®

## A change of hearts

- Compact and portable; ready to be suspended from your (work)bench
- Flexible, easy free mode teaching; can be integrated with essentially any microplate device
- No more need for stacker adjustments for different rack heights

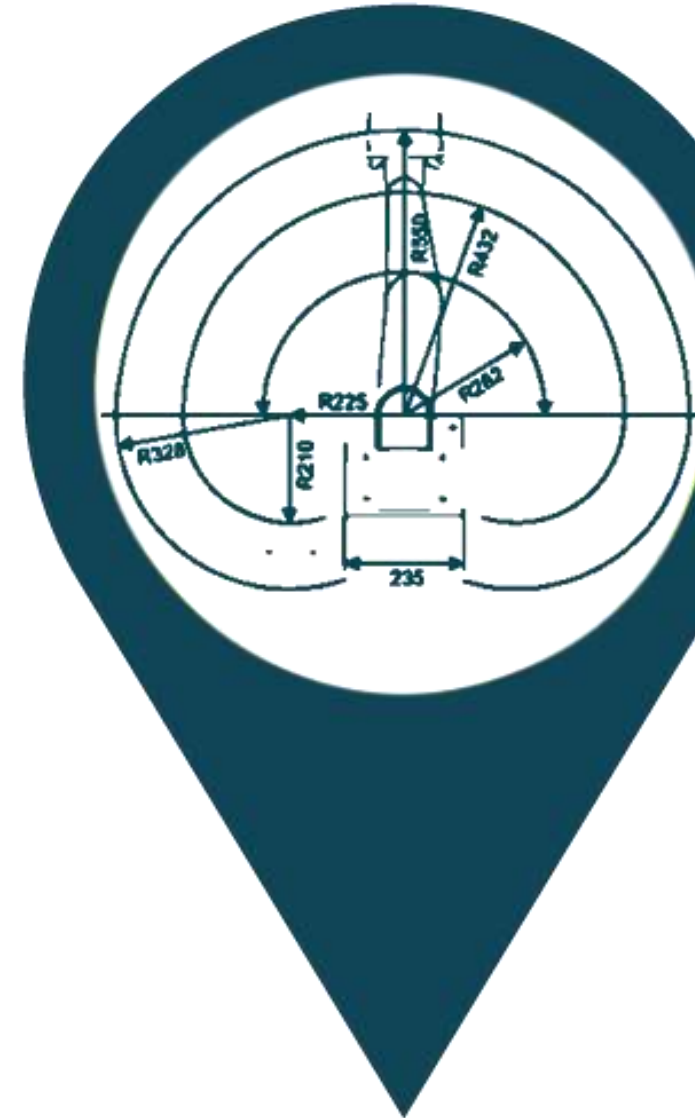

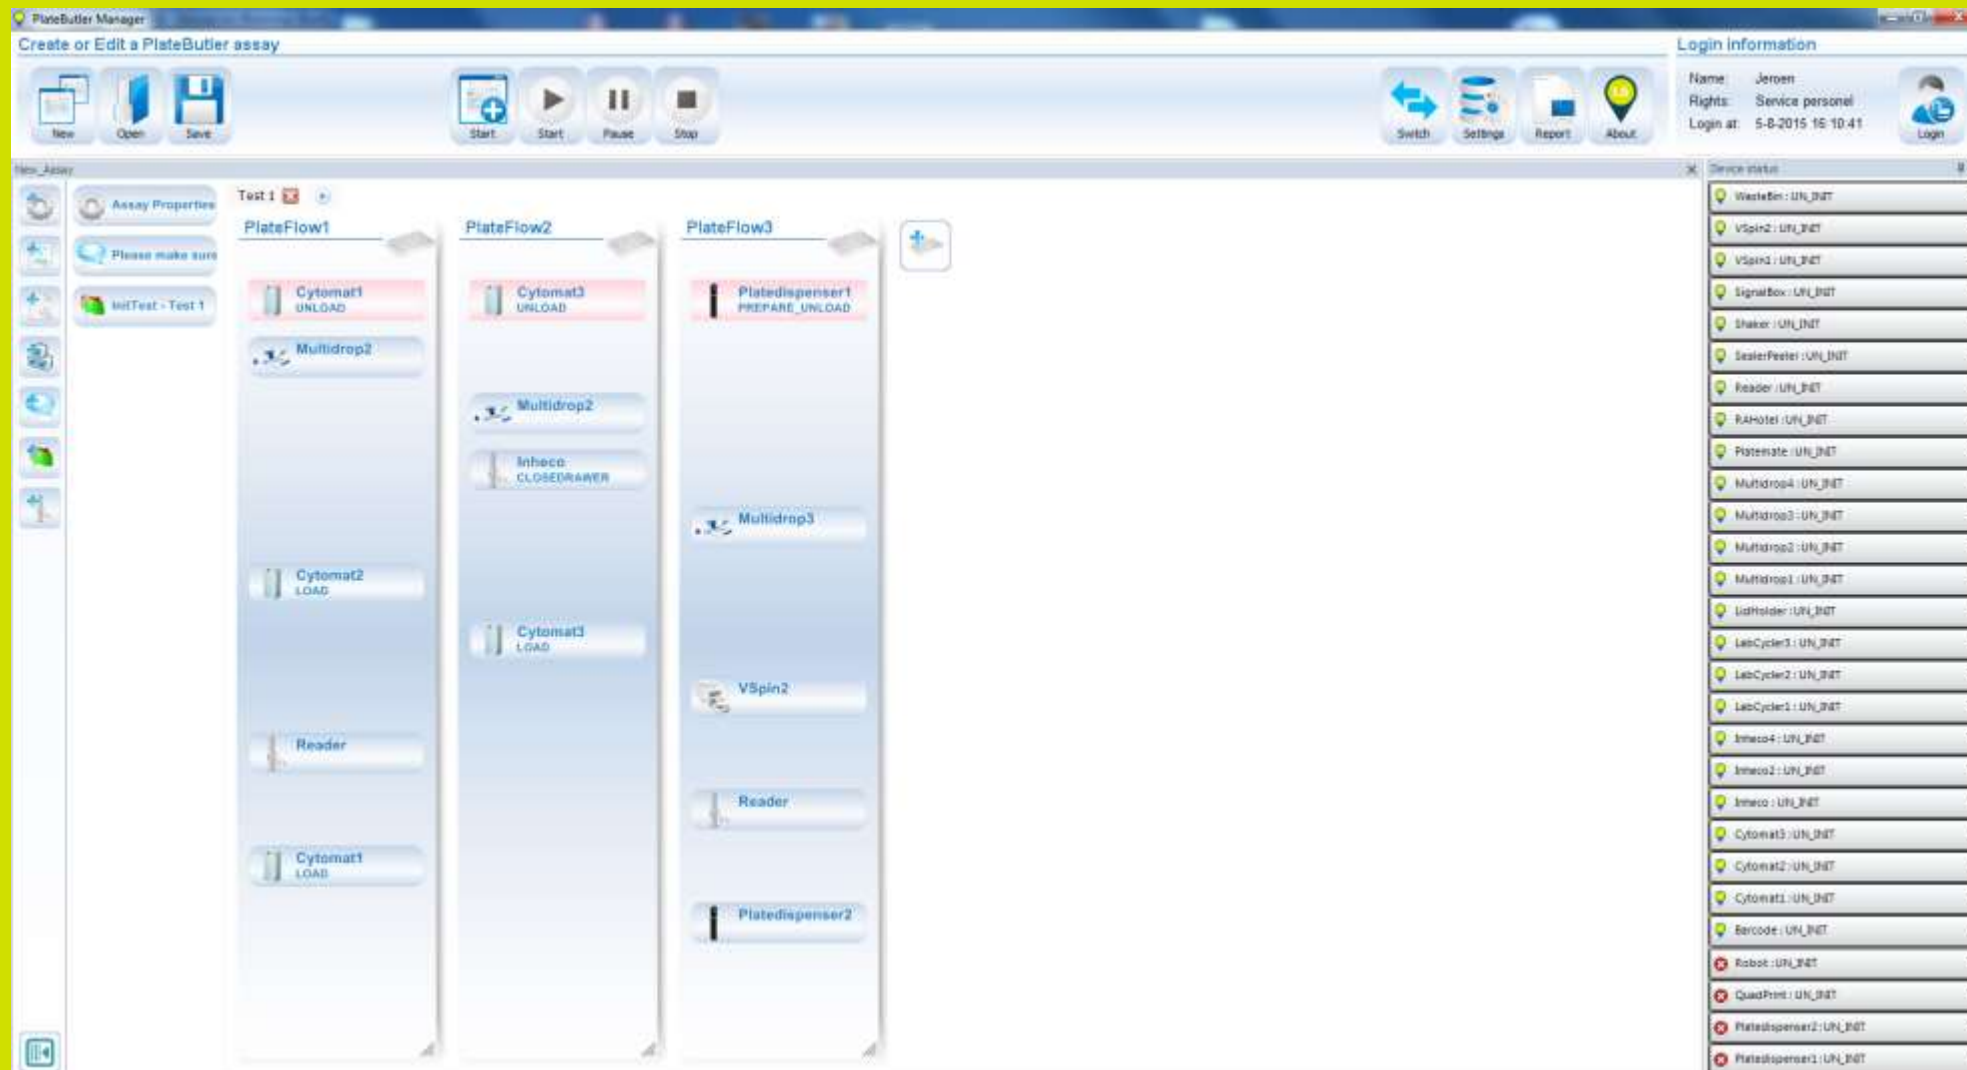

PlateButler® Software V4

## User-friendly, reliable software

- Drag & Drop principle
- A flow-editor is used to create assays, which gives you a clear overview for analysis
- Real-time, reliable data of the actual status from your system
- Versatile, because of the unique compatibility with any brand hardware and peripheral equipment
