

Liquid Handling: Hands-On Workshop

Are you participating in the ELRIG event at Festo in Esslingen?

Then the following hands-on workshop, taking place after the ELRIG meeting on 2 December is a must attend as it will give you an insight into pressure-controlled dispensing and the pipetting of liquids. We will demonstrate to you the basics and then you can simply try it out for yourself in the interactive workshop.

This will be followed by a tour of our technology factory to see how our automation products are manufactured and assembled, and how we use digitalisation and Industry 4.0 in the manufacturing process.

We look forward to seeing you!

Location:

Festo SE & Co. KG
Plieninger Str. 50
73760 Ostfildern-Scharnhausen

Date:

2 December 2022
8.30 am to 3 pm

The Festo logo is displayed in a bold, blue, sans-serif font. The background of the entire page features a woman in a white lab coat and safety goggles, holding a pipette with blue liquid. A large, semi-transparent DNA double helix is visible on the right side of the image.

Join our Hands-On Liquid Handling Workshop

Practice

- Pipetting systems
- Dispensing systems
- Handling liquids using media separated valves and accessories

Find out about the technology of pressure-controlled liquid handling systems and the benefits they offer

- Liquid handling basics
- Run your own practical tests
- Improve your target volume
- Achieve maximum process reliability

Tour of the Festo Scharnhausen production plant – automation systems and Industry 4.0 in action.
